We've got it.

ALL BRANDS FROM A SINGLE SOURCE

For more than 40 years, ELSÄSSER Filtertechnik has been a premium partner to MANN + HUMMEL in the industrial filters segment. As the leading international filter brand, MANN-FILTER offers a comprehensive product portfolio in established OEM quality as well as first-class aftermarket services for the industrial and automotive sectors.

Donaldson is a leading global supplier of filter elements, complete filters, filtration systems and replacement parts. Since January 2017, ELSÄSSER Filtertechnik has been an authorized dealer and can thus procure these filters in first-class quality directly from the manufacturer.

Decades of experience in hydraulic filtration make FILTREC the perfect choice when it comes to ensuring a long service life and trouble-free operation for your hydraulic systems. Since 2011, ELSÄSSER Filtertechnik has been the exclusive distributor of FILTREC hydraulic filters in Germany and Austria.

Since March 2017, ELSÄSSER Filtertechnik has been a partner of Fil Filter, Turkey's largest filter manufacturer. Fil supplies OEM-quality filters to the automotive, construction and agricultural machinery industries, and is certified in accordance with ISO 9001/14001 and TS16949.

Hengst Filtration meets the highest quality standards due to its long-standing experience in diverse areas of filtration and as an OE supplier to renowned car and commercial vehicle manufacturers. Its products are primarily used in the mobility sector. However, Hengst also offers a broad product portfolio that encompasses mechanical and plant engineering, hydraulic applications and building technology.

Cummins Filtration is a world-leading developer and manufacturer of automotive filtration products for on- and off-highway applications. Under the Fleetguard brand, Cummins distributes filtration products that are compatible with a wide range of engine brands. From oil filters and fuel or urea filters to complete air filters with patented elements as well as crankcase breathers, Fleetguard offers a complete filtration package.

Technology, innovation, performance. The UFI FILTERS success story began in Italy in 1971 and continues to this day – it has resulted in global expansion and an established position as a leader in filter technology. As an OE supplier, the world's biggest manufacturers in the automotive and mechanical engineering sectors rely on the UFI brand.

ARGO-HYTOS is active worldwide as a component and system supplier in the field of fluid technology. The company's core competence is sophisticated filter solutions for hydraulic and lubrication systems as well as gear units. It offers solutions ranging from stationary industrial equipment to diverse mobile applications.

The company Sotras was founded in 1975. Alongside the production of hydraulic, oil and air filters, it also specializes in the field of deoiling of compressed air. SOTRAS separators are mainly used in screw compressors and meet even the most challenging requirements issued by compressor manufacturers.

Today, Panclean, based in Italy, remains the market benchmark for OE, OES and IAM cabin filters. Synonymous with excellence – both in terms of the careful selection of raw materials and constant technological innovation – Panclean offers solutions for all working environments.

The Filtration Group brand stands for top-quality industrial filters. Since the 1960s, Filtration Group Industrial has been one of the leading manufacturers of hydraulic filters, automatic filters, process filters, filter systems for air pollution control and separators. The company, formerly the industrial filter division of MAHLE, has always focussed on high quality and innovative products. Its areas of application include various branches of industry, such as metal processing and shipping, as well as conventional power plants and the wind industry.

Parker is the world's leading manufacturer of drive and control technology. The company develops and designs systems and precision solutions for mobile and industrial applications. Almost everything that moves today incorporates Parker technology. In the area of filtration, Parker offers a selection of filters, separators, and cleaning devices. The Parker range available from ELSÄSSER includes fuel filters, hydraulic filters, pre-filters, air filters and engine air filters.
